

STOP and see your supervisor if **ANY** of the following changes before and/or during your work activity.

Check for change in weather conditions throughout your shift and adjust your approach accordingly.

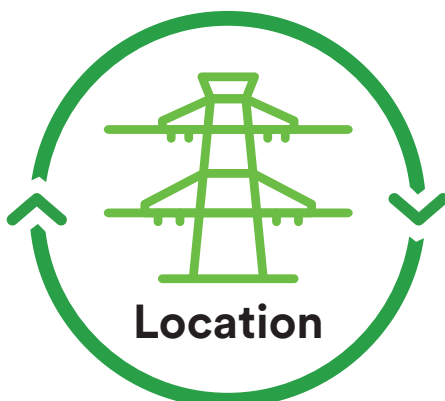

Change in work method, approach or sequence? STOP, THINK, ASSESS, REVIEW, TALK the change and adjust your plans and approach accordingly.

STOP and see your Supervisor if there is a change of plant from what was planned to be used.

Check if people (supervisor, plant operator, worker) have changed for the activity. If you see new faces then cover all bases...re-check everyone's competency, qualifications and understanding of the activity.

Change in your work location? Look up, look down, look around. Check the job is safe to proceed.

Check for simultaneous operations (SIMOPS) impact. Will change affect your work or others?
